EXPERIENCE

• Outlier AI

Oct 2024 - Feb 2025

AI Data Trainer (Remote)

San Francisco, USA

- Trained 500+ AI responses, reducing factual errors by 30 percent through iterative feedback.
- Engaged in text conversations with AI models, providing feedback on language accuracy, cultural nuances, and tone to enhance performance.
- Reviewed AI responses for factual errors, adherence to instructions, ensuring truthful and relevant outputs.
- Collaborated with AI developers to refine language capabilities, streamlining communication, and improving human-like interaction quality.

• Maestro Solutions Ltd.

Jul 2025 - Sept 2025

Internship (On-Site)

Shyamoli, Dhaka

- Developed a Python GUI tool (Tkinter, Matplotlib, MySQL) to visualize real-time server log traffic with dynamic IP/port distribution charts.
- Optimized SQL analytics for anomaly detection, extracting IP/port trends, and automating visualization of high-frequency network activity.
- Built a Python tool for TP-Link routers to scrape network data (WAN/LAN, wireless, devices) using Selenium, BeautifulSoup, and JSON APIs, producing JSON reports.

EDUCATION

• American International University - Bangladesh

Feb 2022 - Jan 2026

BSc in Computer Science and Engineering

Kuril, Dhaka

- CGPA: 3.58/4.00

• Govt. Mohammadpur Model College

Apr 2018 - Feb 2020

HSC

Mohammadpur, Dhaka

- CGPA: 4.92

PROJECTS

• Project A: DayMate – AI-Powered Daily Planner with Weather & News

Nov 2025

Python

- Developed DayMate, a LangGraph-based AI planner using Ollama to generate JSON plans from natural language.
- Integrated OpenWeatherMap and Bing news scraping for real-time, stateful daily planning in Colab.

• Project B: Research Assistant AI Agent

Sep 2025

Python

- Developed Research Assistant AI Agent using LangGraph and Grok LLM to extract, summarize, and query PDF content with stateful reasoning in Colab.
- Integrated ChromaDB for long-term memory, PyPDF2 for text extraction, and short-term MemorySaver for session-aware, context-rich responses.

SKILLS

- **Python:** NumPy, pandas, Matplotlib, Tkinter, Scikit-learn
- **AI/ML Libraries:** Hugging Face Transformers, spaCy
- **Frameworks:** PyTorch (priority for research roles), TensorFlow (for deployment)
- **Version Control:** Git/GitHub
- **Data Management:** MySQL, PostgreSQL, SQL
- **Web Scraping:** Selenium, BeautifulSoup
- **APIs:** JSON, REST
- **LLM & RAG:** Ollama, Groq, ChromaDB, PyPDF2, RecursiveCharacterTextSplitter
- **Agentic AI:** LangChain, LangGraph, MemorySaver, Stateful agents
